**DETAILED ACTION****I. Election/Restriction**

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 in part and 2-19, drawn to products of formula I, classified in class 544, subclass 158.
  - II. Claims 1 in part and 2-19, drawn to products of formula II, classified in various classes and subclasses such as 568/13, 568/20, etc.
2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, are not shown to be used together and each species under each of the groups is distinct in that the distinct structures and form result in each of these species having different modes of operations and different effects both in result and degree. Additionally, the above groups require separate search considerations and separate search strategies, which if left unrestricted would impose a serious burden on the office.
3. The above groups themselves are inclusive of patentably distinct subject matter. Accordingly, along with the election of one of the above groups, the following action is also taken.
4. Claim 1 is generic to a plurality of disclosed patentably distinct species comprising, for example, the compounds of (1) Example I-1, page 4, Example II-1, page 4, etc. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
5. Upon the election of a single disclosed species (e.g. Example, page number and structural depiction), a generic concept, inclusive of the elected species, will be identified by the Examiner for examination. Moreover, whatever specific compound is ultimately elected, applicants are required to list all claims readable thereon.
